

Photo Editing Module

BBT 9

Student Name: _____

Activity 1 (5 Filtered Pictures)

- Apply 5 different filters and/or effects to create five variations of the picture
- Use the original picture and the five variations to make a single image
- Finished image 800x600 pixels in size (800 wide / 600 high)
- Put the unaltered original image in the top left corner
- Include a list of the affects you applied _____/5

Activity 2 (Election Button)

- A Canadian flag as part of your background
- A picture with the background removed (floating head shot)
- Arced (curved) text above "Vote for _____"
- Arced (curved) text below "She/He is the best!" _____/12

Activity 3 (Vintage Photograph)

- Original image for comparison (to show what you have done to your picture)
- You are to experiment with at least **five** different techniques.
- Use a new copy of the picture for each technique.
- A separate description for each image. _____/7

Activity 4A (Remove a person)

- Provide the original picture
- Replace the removed element with some other element of the background of the current picture (don't add something from another picture)
- The results should look as realistic and natural as possible
- It should look like the object (or person) was never there _____/13

Activity 4B (Add person to group)

- Provide the original picture
- Attention to colour, lighting, size and positioning are important
- The results should look as realistic and natural as possible
- It should look like the object (or person) was always there _____/13

Activity 5 (Animated Scene)

- A background relevant to the scene. E.g. Airport, sports field, outer space
- At least six different images that have been modified in PhotoShop
- At least four of the images must be animated (four of the six total)
- Animated images need to have transparent backgrounds
- All of the animation must be purposeful to the scene
- The animation must be at least ten seconds long
- Include the original unedited images in your slide show _____/20
